IAS STAFF MEETING MINUTES

29 March 1974

G. Allen

25X1A

1. Mr. Allen mentioned two actions we have been involved with this week concerning varying aspects of consolidating IAS with NPIC. One action dealt with merging PSS functions with NPIC. The other was a study by the IC Staff dealing with consolidating all community photointelligence resources during crisis situations. These matters are still being staffed out, but it does not appear that any major changes are in the offing at this time.

2. Mr. Allen reported on the Executive Council meetings he attended at Headquarters this week:

a. Mr. Colby has just returned from a two-week trip to Europe. He is looking into ways in which we can foster intelligence relationships with foreign governments.

b. Project [] will become an exclusive Agency project under OBGI auspices with the decision not to renew the contract with []

c. The [] is closing down.

d. Mr. Colby continues to be concerned with questions concerning possible Agency involvement in the Watergate episode. He is initiating another round of file checks and inquiries with a view to clearing the record.

3. [] reminded everyone that the number to be used for verification of employment is []

4. New [] parking passes become effective 8 April. The Headquarters visitors parking permits become effective on 1 April. IAS has two permits--both for "A" lane North Lot. These must be displayed in your car where the guard can see it easily when he drives by.
